### Project Staffing

## “Excellence in Solutions”

### PROJECT CONTROLS IMPLEMENTATION

The Project Controls group provides integrated scheduling, cost controls, change management, training & safety reporting. *Integrated Consulting* utilizes resource loaded schedules; earned value reporting, risk management and productivity analysis tools to assist our clients in successfully trending and forecasting their projects.

### TENDER REVIEW

An extra set of knowledgeable eyes from a non-bias third party can be advantageous prior to bid submission & during bid evaluation. Working with the tender team *Integrated Consulting* provides recommendations on commercial, schedule, cost and risk areas to minimize potential claim areas..

### RESOURCE PROFILING

*Integrated Consulting* can assist in identifying the resources required for major projects, program profiles, & company or regional groups and divisions.

### RISK ANALYSIS

Enabling our clients to clearly identify the probabilities of completion dates, prepare for potential liquidated damages, & properly manage contingencies to remain compliant with SOX 404 sets the stage for a proactive approach to ensuring a successful project.

### TRAINING

*Integrated Consulting* offers tailored training to meet your needs in the following areas:

- Risk Management
- Schedule Development Management
- Cost & Forecast Management

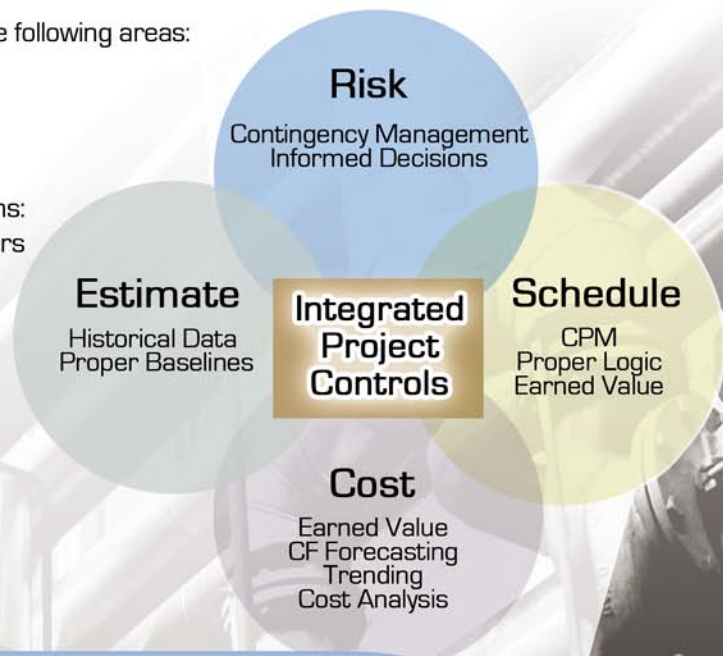

### PROJECT STAFFING

*Integrated Consulting* can assist your staff with the following positions:

- Project Controls Managers
- Risk Managers
- Planner/Schedulers
- Cost Engineers
- Estimators

### COST & SCHEDULE REVIEW/PROGRESSING

*Integrated Consulting* reviews the client's current schedules and cost tools templates for PMI and AACEI standards and best practices. Recommendations are then presented on proper forecasting, potential impacts and delays, critical path analysis, and a best path forward.

We are an independent, quality-conscious project controls company designed specifically to serve you as an extension of your staff.
